## FRONT END DEVELOPER

I am Results-oriented Frontend Developer with intermediate proficiency in HTML5, CSS3, JavaScript, ReactJS, and Tailwind CSS, as well as beginner-level skills in React Router and Redux Toolkit. Seeking a position in Front-end development where I can leverage my expertise to deliver high-quality solutions, collaborate with diverse teams, and continuously expand my knowledge and skills in a dynamic and innovative environment.

## SKILLS

Html5	Bootstrap	Git
Css	TailwindCss	React-router
Javascript	React.js	Redux Toolkit

## PROJECTS

### Swiggy Clone

This Swiggy Clone called Foodies is created by using created-react-app , Jsx , Javascript , ES6 , CSS , React , React-Router , Redux Toolkit , Swiggys Api , Git repository for tracking all changes I made to files in while building this project. And I had used Vercle for hoisting this project.

### Netflix Clone

This Netflix Clone called Chalchitra is created by using created-react-app , Jsx , Javascript , ES6 , TailwindCss , React , React-Router , Redux Toolkit , TMDB Api , Firebase for authentication , Git repository for tracking all changes I made to files in while building this project. And I had used Vercle for hoisting this project.

### Ai Brain Landing Page

I had created this landing page by using Html , Css , Javascript , Git repository for tracking all changes I made to files in while building this project. And I had used Vercle for hoisting this project.

### Personal Portfolio

This Portfolio App is created by using created-react-app , Jsx , Javascript , ES6 , CSS , React , Git repository for tracking all changes I made to files in while building this project. And I had used Vercle for hoisting this project.
